General Information

The Atlantic Provinces Special Education Authority Resource Centre for the Hearing Impaired is located in the town of Amherst, Nova Scotia, close to the New Brunswick/Nova Scotia border. The Centre has been established in its present location since 1961. The Amherst campus, the central feature of the organization providing educational service to deaf and other hearing impaired students from the Atlantic Provinces, has roots going back to 1856. Over the school's 134-year history it has been known as the School for the Deaf, Halifax; the Interprovincial School for the Deaf, (ISD); the Atlantic Provinces Resource Centre for the Hearing Handicapped (APRCHH); and since 1989, as the Atlantic Provinces Special Education Authority Resource Centre for the Hearing Impaired (APSEA-RCHI).

The Resource Centre provides educational programs for children and young adults between the ages of 0-21, who have been diagnosed as having a hearing loss. These services are provided on campus in Amherst and off campus through the preschool program, dayclasses or in the public school setting to residents of the provinces of New Brunswick, Newfoundland, Nova Scotia and Prince Edward Island.

Report of the Program Advisory Committee 1989-1990

The Program Advisory Committee met on two occasions during the 1989-1990 school year. The Committee examined a number of issues concerning the delivery of programs.

A survey of severely/profoundly multihandicapped children was completed and a report was presented to the Board in June, 1990. Briefly summarized, the special education representatives from the four provinces agreed that at the time of the report, severely/profoundly multihandicapped children who do not have a hearing or visual impairment are not in need of service from APSEA. However there was a strong recommendation from the Program Advisory Committee that APSEA should continue to provide services to severely/profoundly multihandicapped children who have a hearing and/or a visual impairment. Following the June meeting, the Board directed the Program Advisory Committee to recommend the level of services that should be provided to these children. Upon examination of the services offered by both resource centres, the Committee recommended the current level of service be maintained.

The Program Advisory Committee received three program proposals over the year for recommendation to the Board. They were the Cooperative Education Expansion Proposal at the Resource Centre for the Visually Impaired, the establishment of a Parent/Infant Centre at the Resource Centre for the Hearing Impaired, and the establishment of a summer camp program for visually-impaired pupils. The Cooperative Education Expansion Proposal and the Parent/Infant Centre received approval in principle from the Program Advisory Committee. However, the summer camp program was not recommended pending the determination of the feasibility of providing short term specialized intervention programs for all APSEA pupils during summer and/or other vacation periods.

The Program Advisory Committee also examined the assessment procedures at both resource centres and recommended to the Board that two new positions be created to allow for a full-time coordinator of assessments for each centre.

The Committee experienced an unexpected turnover in membership this year. Members who submitted their resignations from the Program Advisory Committee include: Grace Beuree (Nova Scotia), Marion Cosman (New Brunswick), Gerri Doherty (Newfoundland), Gwenda Jablonski (Newfoundland). New appointments include: Ed Mackey (Newfoundland), Ann Power (Newfoundland), Carmen Shields (Nova Scotia).

As chairman, I wish to express my appreciation to each member of the Program Advisory Committee for their support and interest during the year. Central office and resource centre staffs provided invaluable assistance and support and appreciation is extended to these individuals for their advice and support.

Respectfully submitted,

Parnell Garland

Director's Report

The school year that concluded in June, 1990 was a full one, requiring unusual adjustments on the part of staff as announcements were made regarding an administrative reorganization to become effective in September, 1990.

Through the co-operation and dedication of the 190 members of the Resource Centre's staff, programs and services were provided to over 540 students. Eighty-one percent of the students received these services in programs provided off campus.

ON-CAMPUS PROGRAMS

Atlantic Technological Vocational Centre

During the year 39 students were enrolled in the Vocational School programs: wood working, motor vehicle body repair, small engine and equipment repair, dress making and design, data entry, business computer operator and off-set and letter-press printing. In addition to the programs provided on campus, support service was given to students enrolled in vocational/technical programs in community colleges located throughout Nova Scotia and New Brunswick.

During the spring term three Career Week programs were held. One Career Week was planned for Francophone students with 12 students attending.

The Professional Development Committee, formed in the fall of 1989, developed two questionnaires that were sent to all staff members. An analysis of their responses has been completed. The information collected will guide the committee in formulating long range recommendations for the professional development of all Resource Centre employees.

The federally funded Innovations Project was further developed during the school year. It has moved closer to its objective to establish

a model assessment centre to provide a vocational assessment profile for the deaf and hard of hearing. Equipment was purchased, staff trained and a number of students assessed. An advisory committee has overseen the work completed to date and provided invaluable guidance for future direction. The vocational assessment unit will be housed in the Assessment Centre in September, 1990.

The Co-Operative Education program, which gives elective students the opportunity to try various occupations before or during their vocational training, continued into its second year. Thirty-seven students had 4,620 hours of co-operative education experience at 57 placements in industry or business in the Amherst area or other locations throughout the province of Nova Scotia. This program operates under the management of Alma Page, Program Co-Ordinator with the co-operation of ATVC staff and the teachers and administrators of other Resource Centre programs.

Academic Program

The Academic on-campus program continued, under the supervision of Raymond LeBlanc, to provide classroom programs for 51 students between the ages of 6 years to approximately 19 years. The department offers a vocational/academic program with students acquiring necessary high school credits at the vocational school and in academic courses.

Through the academic department and with the co-operation of the Amherst Regional High School, the Resource Centre continues to maintain an integrated class of students. This support service has been provided since 1981. With the support of a Resource Centre teacher, students are enrolled at the Amherst Regional High School and complete their requirements for high school graduation. During this school year six Resource Centre students were enrolled in classes at the Amherst Regional High School and received support from Jack Boyd, a Resource Centre teacher.

Fearon Unit

Under the supervision of Dr. Maida Follini, educational programs were provided for 16 deaf-blind children. Throughout the year staff in the department provided consultation in response to requests received from school districts. For one week in June, six intervenors received training under the direction of Dr. Follini. Nine deaf-blind students were provided with the services of an intervenor. This intervenor service was provided by the Canadian Deaf-Blind and Rubella Association, Atlantic Chapter and the Canadian National Institute for the Blind during holiday and weekend periods, with APSEA-RCHI providing the training.

The annual Fearon Unit Parent Workshop, was held on campus on March 6 and 7. A total of 21 visitors participated. In addition to parents and other family members, there was representation from the Canadian Deaf Blind Rubella Association, the CNIB and a teacher from the Dartmouth School District.

Marsden Department

Under the direction of Russell Fisher, Department Head, the Marsden department provided educational services to nine students. The older students attended prevocational classes provided by the staff of the Vocational School.

OFF-CAMPUS PROGRAMS

Preschool Parent Guidance was provided to seventy-six families in New Brunswick and Nova Scotia by parent educators. These teachers, by visiting homes and kindergarten settings, assisted families and worked with hearing-impaired children to stimulate auditory and language development.

During the 1989-90 school term three day classes were maintained in Saint John, one day class in Moncton, and one day class in Fredericton.

In the province of Nova Scotia the Resource Centre maintained one day class in Antigonish, Arcadia, Bedford, Cambridge, Havre

Boucher, Lunenburg and Truro; four day classes in Dartmouth; three day classes in Sydney and two day classes in Wolfville.

Our June 1990 statistics showed that 83 integrated hearing-impaired students were receiving support from itinerant teachers. An additional 23 students, who were integrated, were receiving a visit from itinerant teachers on a monthly basis. Tutorial support was being provided to 87 integrated students. In addition, the Resource Centre's itinerant teachers were providing consultation to public school personnel working with 71 integrated students who had a hearing loss.

During this school term the APSEA Board of Directors supported a pilot project in District 19, Rothesay, New Brunswick. A 15 year old, profoundly deaf student, was fully integrated into a Grade X class and provided with a full time educational assistant/interpreter. This pilot project provided the Resource Centre and the School District the opportunity to determine the issues that needed to be dealt with and the guidelines to be developed, if service of this nature were to be provided by APSEA in the future.

TEACHER EDUCATION PROGRAM

The APSEA-RCHI and Université de Moncton, offer co-operatively a program of studies leading to a degree of Master of Education of the Deaf. The following 12 students were enrolled in the teacher education program this year and were awarded masters degrees by the Université de Moncton. They received their diplomas as teachers of the deaf at the APSEA Resource Centre for the Hearing Impaired graduation exercise on June 27.

Formalized Procedures

During the school year the Resource Centre formalized procedures for the development of individual educational plans for all students enrolled at the Resource Centre, ATVC and in Day Programs. Procedures were also initiated for a yearly review of each student's educational placement. At these placement reviews parents, school district personnel, and APSEA-RCHI staff have an opportunity to discuss student progress and future placement.

An employee assistance program received approval of the APSEA Board of Directors. The program available to members of the Nova Scotia Government Employee's Union was recommended by the APSEA-RCHI Labour Management Committee. It will see further development and supervision by the EAP Committee. Membership on this committee is representative of both management and staff from the APSEA Resource Centre for the Hearing Impaired and the APSEA Resource Centre for the Visually Impaired.

During the year a number of committees met to examine a wide variety of issues. A staff committee worked diligently to review school procedures and formalize these in writing. This committee, known as the Behaviour Management Committee has developed guidelines for Resource Centre employees and students in a number of areas.

Five staff members worked as a committee to formulate recommendations regarding the use of sign language in Resource Centre programs. A draft report outlined required levels of competency for certification and recommended course outlines. In August, 1989 the Resource Centre provided an inservice that would assist employees in improving signing skills.

Retirement

On May 17, the staff gathered to express gratitude and best wishes to a number of retirees.

- Russell Fisher, after 29 years, leaves a career as a classroom teacher and head of the Marsden department.
- Howie Spence's career with us covered 28 years, during which time he was teacher, supervisor, audiologist, and a member of the Assessment Team.
- Rodger Chapman completed 28 years as head janitor.
- Douglas Hawkes, our electrician, leaves us after 16 years of employment.
- Roger Babineau, print shop teacher, has been a staff member for 15 years.
- Phyllis Brown leaves the cafeteria worker position after 14 1/2 years.
- Muriel Terris, after 4 years, retired from her position as a cafeteria worker.

Workshops

Two major inservices were held this year. On October 5 & 6, teachers, teacher aides, and residence counsellors attended the fall inservice. A number of presentations were given by Resource Centre staff with one presentation being given by Dr. John Harpur on the use of a computer to produce stories and vocabulary in signs. The participants were able to choose from as many as nineteen sessions presented over the 2 days.

On May 17 & 18, the second major on-campus workshop was held. The topic of the workshop was the development of the Individual Education Plan (I.E.P.) for children enrolled in APSEA-RCHI programs. Through small group sessions, staff received information on how to develop an IEP. The groups also received feedback on a recent staff development survey completed by all staff.

On the last morning of the May workshop, a presentation on suicide was given by Theresa Edwards, Classification Officer, Cape Breton Correctional Centre.

Early in September, David Lyon and Reg Dunphy, Resource Centre audiologists, presented a two day workshop on ear mold technology. This workshop was attended by itinerant and preschool teachers and certified them to make ear molds for those children served by the Resource Centre.

Throughout the provinces of New Brunswick and Nova Scotia, the off-campus supervisors and itinerant teachers presented a number of workshops to public school teachers, principals, guidance counsellors, and parents on the language development of hearing-impaired children and provided information on hearing loss, audiograms and hearing aids.

In early February, a workshop "Deaf Culture" was presented to Resource Centre staff. The presentation and small group sessions generated interesting discussions among the staff.

On April 26 & 27 a preschool parent workshop was held at the Resource Centre. More than sixty parents attended. A number of Resource Centre staff gave presentations during the two days.

At the CEC Conference held in Toronto in April, Dodie French, Teacher Education Co-Ordinator, with two of her CEC colleagues, gave a presentation on planning for school accessibility.

Linda MacDonald, Teacher Education Associate, gave two sign language workshops to staff at the Highland View Regional Hospital in Amherst.

In early June, David Lyon, Audiologist, travelled to Antigua at the invitation of the University of West Indies, where he presented a workshop on hearing impairment; speech and language problems associated with hearing loss; and educating hearing-impaired preschoolers.

Annual Medical Report for 1989-1990

The 1989-1990 academic year was relatively free of medical problems at the school. During the school year I had 15 patient visits in my office and 191 patient visits at school.

As usual all children on medication received routine bloodwork.

A dental hygiene clinic was held from January 22, 1990 to February 2, 1990. Students received prophylactic fluoride treatments.

Dr. Gill was available to the school for conferences on any problem children and for medication reviews.

Dr. Herbert Orlik, Child Psychiatrist at IWK, now visits Amherst monthly and has been available for advice in special instances.

Dr. Frank Bravo, ENT Specialist, came to Highland View Regional Hospital in February 1990 and has been holding short ENT clinics most weeks at the Infirmary. From February to June there were 55 patients.

Regular height and weight checks are kept on all students and where necessary the dietitian is consulted.

In closing, I would like to take this opportunity to thank the efficient caring nursing staff for their assistance.

Gillian Lawrence, M.B., B.S., L.M.S.S.A.
School Physician
